

Jaypee Public School Noida – Sustainable School

International E-Waste Day was observed at Jaypee Public School in Noida on October 14 and 15, 2022. It was the first action taken with pride in controlling e-waste by the school.

For the past month, a dedicated team of volunteers known as the "Climbers" had been working to spread the word about the event. They spread awareness about the importance of sustainability and the long-term effects that incorrect handling of e-waste has on our planet via posters, slogans, nukkad-nattak, and rap songs. Additionally, the different categories of e-waste and typical myths around it were also explained to the learners. More than 500 students from kindergarten to XII grade participated in the event by bringing their own e-waste. All the collected material is being sent to Green Dream Foundation. Through this event, Jaypee Public School inculcated values like high-quality education (SDG goal 4), upholding sustainably-run cities and communities (SDG goal 11), addressing climate change (SDG goal 13), and good health and wellbeing (SDG goal 3) among students.
